Full Stack Developer with +8 years of hands-on experience designing, developing, and implementing web applications and services using various technologies. Proficient in both front-end (Angular, HTML, CSS) and back-end (Python, PHP) development, with a strong understanding of databases (SQL) and cloud infrastructure.

EXPERIENCE

Full Stack Developer

Mar 2023 – Present

Lit-Online, Bekaa

- Collaborate with front-end developers and a team of 5 members to test the project, ensuring smooth integration and delivery of user-facing elements.
- Execute secure and efficient data transfer mechanisms between internal systems and third-party platforms, improving system performance.
- Maintain server-side logic, databases, and APIs, ensuring 100% uptime and streamlined operations for high-traffic applications.
- Optimize back-end systems using PHP, achieving 0% errors and ensuring seamless functionality across platforms.
- Ensure web application performance, scalability, and security, improving load times and zero security breaches.

Web Developer (Freelance)

Dec 2015 – Present

Self-Employed, Bekaa

- Deploy 12+ dynamic, interactive websites across educational and hospitality sectors using HTML, CSS, JavaScript, Bootstrap, and jQuery, enhancing user engagement.
- Create landing pages daily, aligning with business requirements and project launches, driving a 20% increase in conversions for new product releases.
- Automate key processes related to lead generation, lead distribution, and system management, increasing overall operational efficiency by 50%.
- Provide advanced coding support to developers, resolving critical bugs and reducing issue resolution time, ensuring smooth project progress.
- Engineer CMS dashboards and efficiently manage databases with MySQL and Google Firebase, improving data retrieval times.

Web Developer

Nov 2014 – Nov 2015

Sama Media, Bekaa

- Developed and launched 3+ websites using WordPress and Joomla, collaborating with a team of 3 members to meet client specifications and project deadlines.
- Implemented custom client-requested features in Lebanon and Saudi Arabia using PHP, enhancing website functionality and user experience.
- Managed SQL database queries to optimize data retrieval, ensuring website scalability and performance for high-traffic environments.
- Conducted comprehensive user research and testing, resulting in a 15% improvement in website usability and user engagement.
- Troubleshoot and resolved complex automation workflow issues, improving system efficiency and reducing website downtime.

EDUCATION

Technical Diploma in Computer Engineering

Damascus University, Damascus

SKILLS

Full-Stack Development, Back-End Web Development, Front-End Development, Server Side, PHP, MYSQL Database, HTML5, CSS, JavaScript, JQuery, Typescript, Angular, Bootstrap, WordPress, NoSQL, Flutter Frameworks, Google Firebase, Node.js, Git, Troubleshooting, Communication, Problem Solving, Critical Thinking.
